

Franchise Fee Reporting (csFFee)

Consolidate franchising agreements.

NEW!!! Consolidation processes supporting True-up and Payment Processing (Optional)

csFFee provides strategic, user driven views of the most crucial financial data needed to pay franchising authorities. Consolidate and manage an unlimited number of franchising authority rules into a single, easily manageable location.

Extract, calculate, and format data needed to pay franchise authorities quickly and cost effectively. Drill down to any level desired for an detailed multi dimensional view. Taxes are presented for analysis and can be reported in any desired format for maximized flexibility.

csFFee Highlights

Core Features:

- Standard with built in computations and rules.
- Allows for changes to default values for percentage and minimum amount.
- User friendly with Microsoft tools like Excel.
- Billing system independent.
- Allows for multiple input types (Billing system data, General Ledger data, etc).

Benefits:

- **Reduce time** spent compiling information from billing system data and / or reports.
- **Increase accuracy** by eliminating recording errors and confusion.
- **Increase efficiency** by supplying the most accurate and up-to-date financial information to your franchise authorities.
- **Reconcile** back to billing system reports and General Ledger.

How it works

Franchise fee reporting can be time consuming, difficult and costly. Let our industry leading csFFee processes designed by industry experts efficiently and accurately expedite your franchise fee payments and reports.

- Concise extracts data from AMDOCS, CSG and/or Convergys financial reports, non-subscriber revenue or other data.
- Data is imported into a csMart.
- Business rules are applied.
- Data is summarized then loaded it into a workbook(s) or another format of choice.
- Optional consolidation add-ons supporting True-up and/or Payment Processing are available.
