

Data Mart (csMart)

Simplified Data Processing

The Concise Data Mart resides either on client or Concise Solutions systems and periodically receives snapshot data from Concise that has been through a cleansing process and optimized into relational structures. Data can be gathered from any source, anywhere, and any format.

csMart stores data on a desktop platform or server and is accessible in an easy-to-use format by most off-the-shelf applications such as MS Excel or MS Access.

csMart Highlights

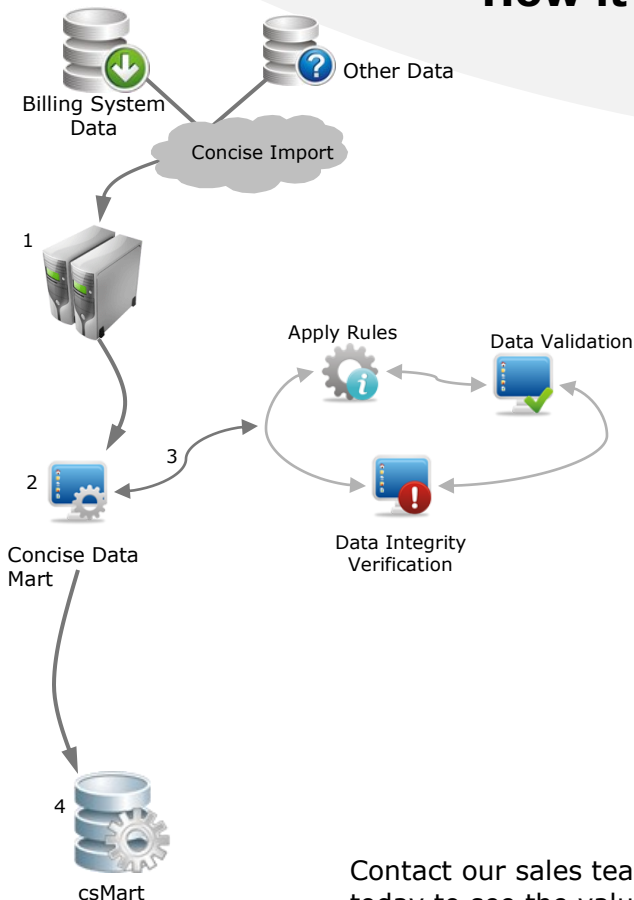

Core Features:

- Billing system independent relational structures.
- Billing system flat data structures in real relational structures.
- Create custom reports.

Benefits:

- **Reduce** operating costs.
- **Eliminate** billing system dependencies.
- **Streamline** data extraction, query generation and reporting.
- **Single source** data extraction and import process.
- Data **validation**.
- Data **recovery** of discarded billing system data on projects.

How it works

Our processes are designed to add efficiency to your work, not force you to change the way you work. If you're not pleased with the processes you currently follow, we can work with you to establish new processes complimentary to your objectives.

We are incredibly efficient at what we do, so we do the hard work for you.

1. Concise extracts information from billing systems or other sources.
2. Data is imported into a Concise Data Mart.
3. Business rules are applied.
4. Data is output into a relational database.

How long does delivery take?

- We Load
 - We Process
 - We Deliver
- All in under 24 hours.
